

I graduated from Fresno State in 2001 with a degree in Marketing and Logistics. I have been working with John S. Connor for 16 years, starting in inbound freight operations before moving into sales. I work with companies both large and small, public and private, experienced and new to international markets. I assist in not only moving freight but analyzing their supply chain for inefficiencies with an end goal of helping to improve their bottom line. I am involved with various industry groups such as the Council of Supply Chain Management Professionals, Business Network for Off-Shore Wind, and the Broker's Association. I am married with 4 children. I enjoy coaching my daughter's indoor and outdoor soccer teams and volunteering with her Girl Scout troop.
